COLD  PRESSES

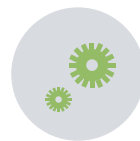

The CP MiniFiller

Craftsmanship meets technology
in fresh juice extraction

Cold Pressed Juices

Cold pressed fruit and vegetable juices are tasty as well as healthy, and are changing the global juice market. These super fresh juices still contain enzymes and the original nutritional value as nature intended. The use of the CP MiniFiller, in combination with the Cold Press No.1 makes it very easy to produce and bottle cold pressed juices.

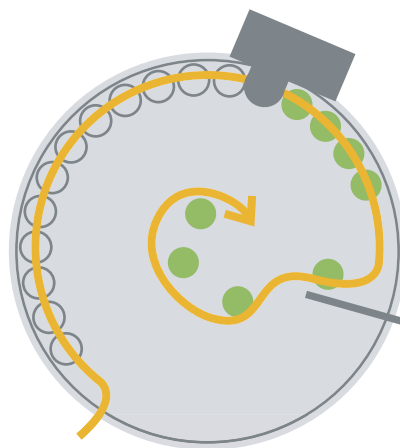

The Perfect Match

Empty bottles are placed on the rotating table and are automatically detected by a sensor in front of the filling head. The CP MiniFiller measures a volume of 50 up to 1000ml fully automatic. After filling, the only remaining manual handling is capping the bottles. With a production capacity up to 100 Liters per hour the CP MiniFiller is a perfect match with the Cold Press No.1.
